About this Document

The Health Republic Insurance of New York Formulary (or preferred drug list) is a comprehensive list of prescription drugs covered through your prescription drug benefit. The list was created by Health Republic in collaboration with our Pharmacy Benefits Management partner and a team of independent physicians and pharmacists (the Pharmacy and Therapeutics Committee) to safely, effectively, and affordably treat a wide range of medical conditions.

Once you've met your health plan's deductible, the drugs on this list are available to you from participating pharmacies at co-pays reduced significantly from retail prices. However, not all plans require you to meet your deductible before co-pay prices go into effect, so be sure to check your plan's Certificate of Coverage. Participating pharmacies include major chains such as Walgreen's, Rite Aid, CVS, and Walmart, as well as many locally-owned pharmacies.

To locate a pharmacy, check deductible status, review your claim history, search the formulary, and view a drug cost calculator, please log in to your Health Republic Member Center and click on the "Pharmacy" option on the right side of the screen.

HOW TO USE THIS DOCUMENT

When viewed online, this document represents the most current and up-to-date version of the preferred drug list. To search for a specific drug in this document, simultaneously press "Control" + "F" (PC) or "Command" + "F" (Mac), then type the name of the drug and press "Enter."

There is also an alphabetical index of drug names beginning on **Page 282**.

If you have any questions about this list please contact Health Republic at 888-990-5702.

Frequently Asked Questions

What is the drug formulary tier system and how does it benefit me?

In order to control cost for our members, we've carefully evaluated our preferred drug list for safety, efficacy, and retail price to develop a five-tier formulary system to reflect levels of co-payment. This helps us identify drugs that are quite expensive but provide no additional benefit over other less expensive drugs. Therefore, we're able to distribute costs accordingly and maximize value.

The five-tier system structure is:

Tier	Co-pay level (exact dollar amount depends on plan)	Description
0	\$0, regardless of plan	Preferred Preventive Drugs (e.g. smoking cessation aids and birth control)
1	\$	Preferred Generic Drugs
2	\$	Preferred Brand Drugs
3	\$	Non-Preferred Brand Drugs and Generic Drugs
4	\$	Specialty Drugs (e.g. drugs used to treat complex conditions such as cancer and rheumatoid arthritis)

Why are generic drugs preferred over brand name drugs?

Generic drugs have the same active ingredients, strength, dosage, intended use, and delivery methods as brand name counterparts except they often cost significantly less. Asking your provider to prescribe generic over brand name drugs, when medically appropriate, can help reduce your out-of-pocket costs. (For more information, please see this [fact sheet](#) prepared by the FDA.)

The reason generics cost significantly less than brand name has to do with the patent rights governing the pharmaceutical industry. When a new drug is developed and approved by the FDA, the company that designed it is awarded exclusive patent and branding rights for 20 years. During this time, the company benefits from exclusive selling rights to that brand drug, allowing them to recoup the tremendous costs of research and development. When the patent rights expire, other companies are allowed to manufacture and sell generic versions of the drug under a nonproprietary name agreed upon by a national council. Since these companies invest only in the manufacturing costs of the drug and are operating in a competitive open market, the cost of generics is inevitably cheaper than their brand name counterparts.

For example, the brand name drug, Lipitor, a popular medication for lowering LDL cholesterol levels, became available in generic form in December 2011 and is known as Atorvastatin. The retail price of Lipitor is relatively expensive compared to Atorvastatin, a tier 1 generic, which is available to Health Republic members at their lowest co-pay level.

Are the drugs on this list subject to any restrictions?

Yes. For select drugs on this list, restrictions may apply. These restrictions include Prior Authorization, Step Therapy, Age Limits, and Quantity Limits (including Max Daily Dose, Max Package Limit, and Max Fill Limit). Please see the explanations below.

Prior Authorization: For drugs requiring prior authorization, the prescribing physician must submit a prior authorization form to our Pharmacy Benefits Department demonstrating medical necessity of the drug. In these requests, it is important that the prescribing physician provide thorough documentation, such as other therapies or treatments that have been tried, for how long, and what those results have been. This will assist the physician or pharmacist who is reviewing the request to understand your history and the clinical rationale for this request. This is often necessary in the case of drugs that have safety hazards, a high potential for abuse, or are extremely expensive. This approval process helps control costs for all our members.

Once your physician has sent the necessary information, a prior authorization decision should be made within 72 hours (weekends and holidays excluded). If the authorization is approved, your pharmacy will charge you the standard co-pay according to the drug's tier level and your health plan. If it is not approved, you can still purchase the drug, but you will be responsible for the full cost.

Step Therapy: Step therapy requires that an alternative drug (or drugs) is prescribed before Health Republic will cover the drug in question. Drugs requiring step therapy are often popularly prescribed, even when a more cost-effective drug has been recommended by nationally recognized treatment guidelines as the first line of therapy. Step therapy is a necessary measure to prevent unnecessary costs from being passed on to members.

Age Limits: These drugs require that certain age restrictions are met before Health Republic will cover the drug. These limits are consistent with FDA and manufacturer usage recommendations.

Quantity Limit / Max Daily Dose / Max Package Limit / Max Fill Limit: Some drugs have quantity limits (including max daily dose, max package limit, and max fill limit), meaning Health Republic will not cover more than a limited amount of the drug. These limits are consistent with FDA and manufacturer usage recommendations. They usually apply to drugs that have been found ineffective or dangerous at higher than normal doses. For example, strong opioid painkillers are frequently subject to quantity limits because of their habit forming nature and safety risks.

Can I request an exemption to the above restrictions?

Yes. To request an exemption to any of these restrictions, your physician can submit a prior authorization form with the appropriate clinical reasoning. Once our Pharmacy Benefits Department has the necessary information, a decision should be made within 72 hours (weekends and holidays excluded).

Please follow these guidelines for efficient processing of prior authorization requests:

1. Complete the prior authorization form. Be sure to include all pertinent clinical notes/documentation.

2. Fax to US Script at 866-399-0929.
3. If approved, US Script notifies the prescriber by fax.
4. If the clinical information provided does not explain the reason for the requested medication, US Script responds to the prescriber by fax, offering formulary alternatives.
5. For urgent or after-hours requests, a pharmacy can provide up to a 72-hour supply of most medications by calling the US Script Pharmacy Help Desk at 800-460-8988.

Can this list change?

Yes. As new products and information become available, drugs may be added or removed from this list. This usually occurs when generic alternatives become available to expensive brand name drugs, or the safety of a drug is called into question by the FDA. In the event that a drug is removed from our Preferred Drug List, we will notify our members. We will never remove a drug without providing an equally effective alternative.

What if my drug is not on this list?

If a drug you've been prescribed is not on this list, you can contact our Pharmacy Benefits Department at 888-990-5702 to request help in selecting a clinically equivalent alternative. You should also notify your physician to see what other alternatives on the formulary may be right for you.

If you wish to seek an exemption due to medical necessity, please have your doctor submit a prior authorization form with the appropriate clinical documentation. We will usually approve requests for medications that are medically necessary and for which we do not provide an alternative. Unless otherwise noted, we will not cover the following drug types: over-the-counter drugs, oral vitamins and minerals, drugs and other agents used for cosmetic purposes or for hair growth.

If you are a new or prospective member of Health Republic seeking to continue use of a drug that does not appear on this list, please contact our Pharmacy Benefits Department to discuss options for continuity of care.

Finally, you can always pay full price for a drug you've been prescribed that is not on this list. This formulary provides you with a list of drugs preferred by Health Republic that are covered under your pharmacy benefit; however, you are not required to purchase the drugs on this formulary.

LEGEND		
TIER	DESCRIPTION	
0	Preventative	
1	Preferred Generics	
2	Preferred Brands	
3	Non-Preferred Brands	
4	Specialty	
TYPE	DESCRIPTION	
QL	Quantity Limit	There is a limit on the amount of drug covered per prescription, or within a specific time frame.
PA	Prior Authorization	Prior Authorization required before prescription can be filled.
